

All you need to know about...

Wallpaper Paste

Earthborn Wallpaper Paste is a fungicide-free, non toxic adhesive designed for hanging wallpaper on absorbent interior surfaces. Made from pure methyl cellulose, it contains no preservatives or synthetic resins, making it safe and reliable for healthy indoor environments.

Why choose Wallpaper Paste?

- **Fungicide-free** – Ideal for eco concious interiors
- **Non-toxic and non allergenic** – Safe for use around people and pets
- **Easy to use** – Forms a smooth, lump free paste

Where to use it

Earthborn Wallpaper Paste is ideal for:

- Hanging wallpaper on clean, dry, and absorbent interior surfaces

Can be used with heavier wallpapers (600-800g) and 'paste the wall' papers.

Before you start

For best results, ensure surfaces are sound, dry, clean, and free from dust. Remove existing wallpaper whenever possible, as the paste is formulated for absorbent surfaces*. On very absorbent surfaces, size first with a diluted coat of wallpaper paste to ensure even adhesion.

*If the existing wallpaper is firmly attached, dry, clean, and absorbent, it may be possible to apply wallpaper directly over it. This is not the standard recommendation, so check the surface carefully and carry out a small test area first.

What's inside?

Pure methylcellulose of various fibre lengths.

Free from fungicides, preservatives, and synthetic resins.

Storage & Disposal

- Keep containers tightly sealed and store in a cool, dry, frost-free place
- Allow unused paste to dry and dispose of safely according to local authority disposal guidelines
- Wash tools with warm water immediately after use

Key Facts

Coverage and suggested mixing ratios:

Diluted coat / sizing: 70g in 5L of water covers approx. 40 m²

Standard wallpaper: 100g in 5L covers approx. 28 m²

Heavy wallpaper: 125g in 5L covers approx. 20 m²

Pack sizes:

100g, 500

Thinner:

Water

Tools:

Brush or wallpaper paste machine

All you need to know about...

Wallpaper Paste

How to apply

- Sprinkle Earthborn Wallpaper Paste into warm water according to the suggested ratio, stirring constantly until a smooth, lump free paste is formed
- Leave to stand for approximately 30 minutes, then stir thoroughly once more before use
- Apply evenly to the wallpaper, ensuring full coverage to the edges. Remove any excess paste from the top of the wallpaper before it dries
- Press the wallpaper to the wall evenly, avoiding air pockets
- For previously wallpapered surfaces (where suitable), the standard dilution can be used; lightly pre-paste the old wallpaper if needed, let it soak briefly, then apply paste to the back of the new wallpaper as usual

Safety first

Avoid dust formation when handling the dry powder.

Earthborn Wallpaper Paste is non-toxic and safe but avoid contact with fabrics and furnishings to prevent staining.

Even though the product is non-hazardous, keep out of the reach of children.

Please refer to the Material Safety Data Sheet for full details.

A few important notes:

- Best results are achieved on absorbent surfaces
- Follow the manufacturer's guidelines for the wallpaper being hung
- Dried paste on wallpaper, including vinyl-coated surfaces, can usually be removed carefully with a damp sponge. Using lukewarm water with a drop of mild detergent can help but work gently and repeat as needed to avoid damaging the wallpaper

Vegan declaration

At Earthborn we are committed to providing products that are better for our homes, our health and our planet.

To that end, we always try to be as open and honest as possible to our customers. Wallpaper Paste and the raw materials are not tested on animals.

VOC Content

Not subject to VOC regulations.
